1. The following is an examiner's statement of reasons for allowance:

For claims 1-20, the prior art fails to teach a combination of :

splitting the extracted clock signal into a first clock signal and a second clock signal;

feeding the first clock signal to a phase locked loop for use in a transceiver; and
passing the second clock signal to a remote location.

For claims 21-22, the prior art fails to teach a combination of:

the primary framer extracting a clock signal from the incoming signal and

passing the clock signal to the phase locked loop for use by the transceiver, the time switch receiving a payload signal and splitting the payload signal, the secondary framer receiving one of the payload signals from the time switch and a clock signal from the primary framer and passing the payload and the clock signals to the second base station.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Berger (5,696,800) and Gabara (6,317,008) are all cited to show systems which are considered pertinent to the claimed invention.
